enterprise spirit.**

Business Development

Communication infra for structure construction work

【Mobile phone base station】

We can handle all-around work related to radio equipment.

Our strengths are the installation, wiring of wireless equipment (various types of communication cables including electrical and optical cables) and high-place work.

Also radio wave measurement calibrated through the construction of mobile phone base stations which from each careers too.

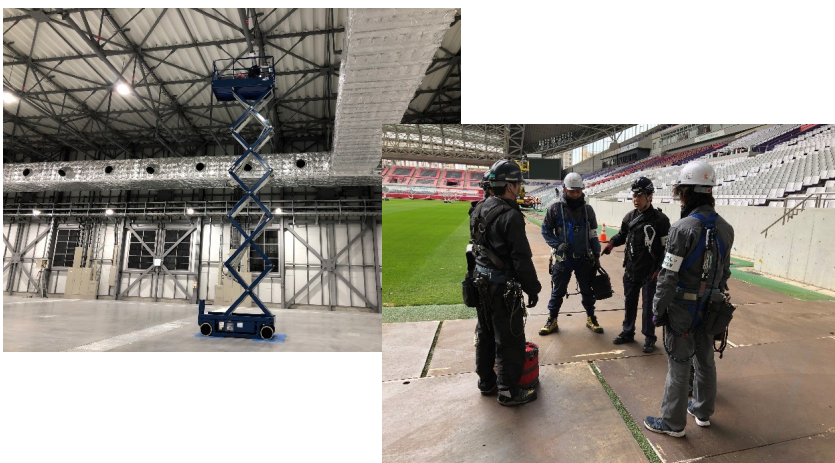

One of our major features is that we have a direct management system for negotiation, design, construction, and testing.

For each client, we promise that we are not only comply with Deadlines but also respond all orders with perfect quality, safeness and speed.

In Japan, we have bases for all over the country, so we can handle all areas.

sale of materials for each construction.

We offer each materials below at low prices but high quality of high-performanced.

/Steel materials and hardware

/Optical cables

/Wirelss equipments

so Please feel free to contact us not only when procuring steel hardware in the future, but also when considering the materials currently delivering.

【 Product overview (partial example)】

photoelectric composite cable

Optical + Electrical
Hybrid for Antenna
In-door/Out-door

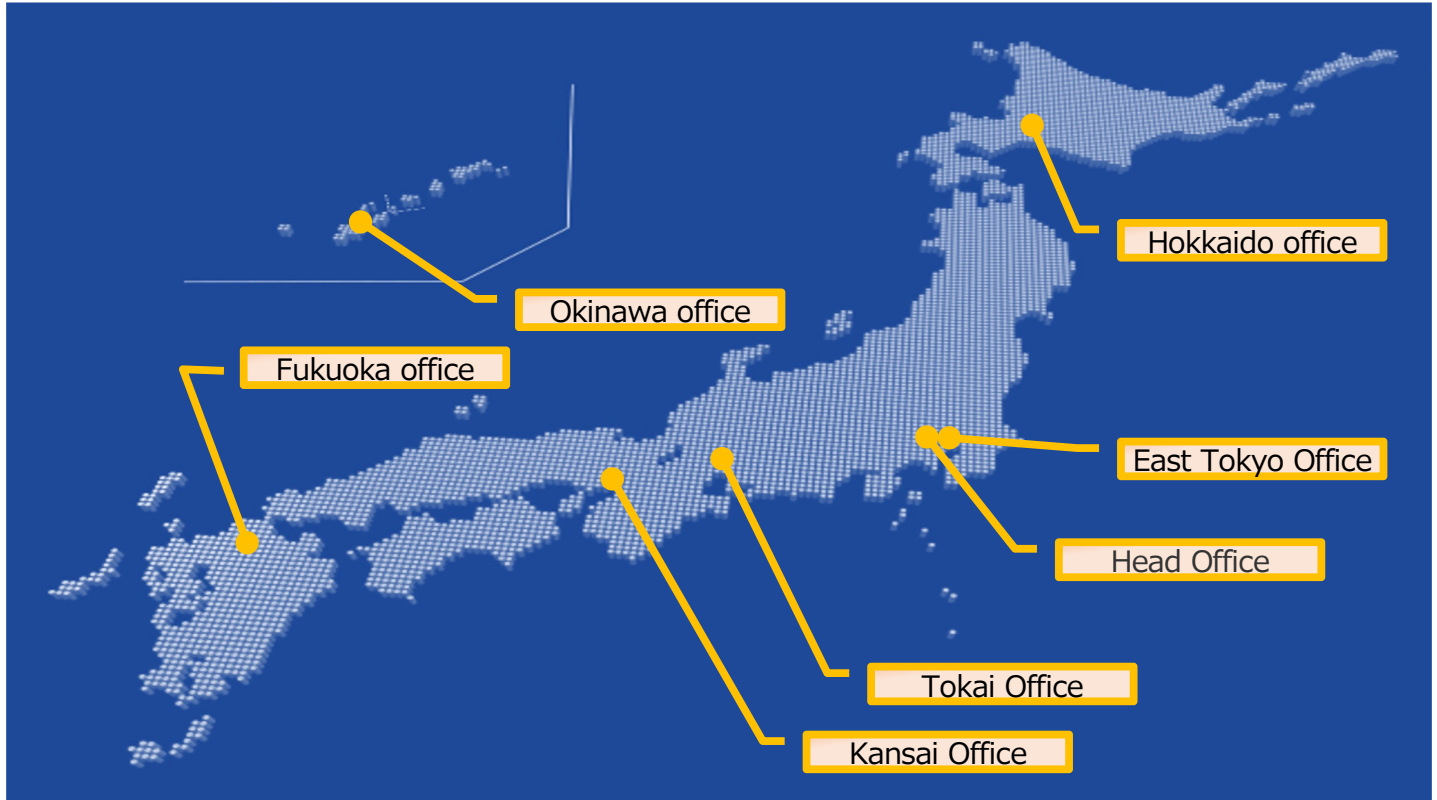

FTTH cable

Fiber To The Home
High speed internet, network
Round / Figure '8' / Flat type

indoor optical cable

Simplex , Duplex Zip
Distribution, Breakout
Patch cord / Jumper cord

Japan base
